

COURSE DESCRIPTION

Learn about the requirements of ISO 50001:2018 so that you can implement, manage and continually improve energy performance in your organisation.

LEARNING OBJECTIVES

BY THE END OF THIS COURSE, YOU WILL BE ABLE TO:

- Follow a systematic approach to establish processes that will improve energy-related performance and energy efficiency
- Incorporate the Plan-Do-Check-Act (PDCA) model and risk-based thinking into the management system processes so that you can address risks and make the most of any opportunities
- Create a culture where employees are encouraged to take an active role in saving energy and improving energy use and consumption

WHO SHOULD ATTEND

Anyone who requires knowledge of the basics of ISO 50001:2018 or needs to develop their skills in managing saving energy and improving energy use and consumption.

No prior knowledge is needed.

COURSE CONTENT

- Introduction to energy management, background and relationship with other management system standards
- High level framework, clauses, process approach and risk-based thinking
- Process evaluation and improvement to control and reduce undesired effects from internal and external issues
- Planning for risk to ensure the management system will achieve its objectives
- Leadership commitment and responsibilities
- Support and what's needed for the management system to operate effectively
- Performance review and monitoring to identify any actions needed for the correction and continual improvement of the management system
