

DRIVING QUALITY BUSINESS PRACTICES

MITIGATING RISKS THROUGHOUT YOUR ORGANIZATION:

About Quality Assessments

Product quality and safety are key priorities for consumers. Any failure of product quality could result in customer complaints and recalls. To ensure customers are satisfied with products, every production site needs reliable manufacturing and quality control systems.

SGS provides Factory Quality Assessments to verify the actual degree of compliance of your quality system, systematically evaluating every process in the production plant and analyzing the strengths and weaknesses in the manufacturing system.

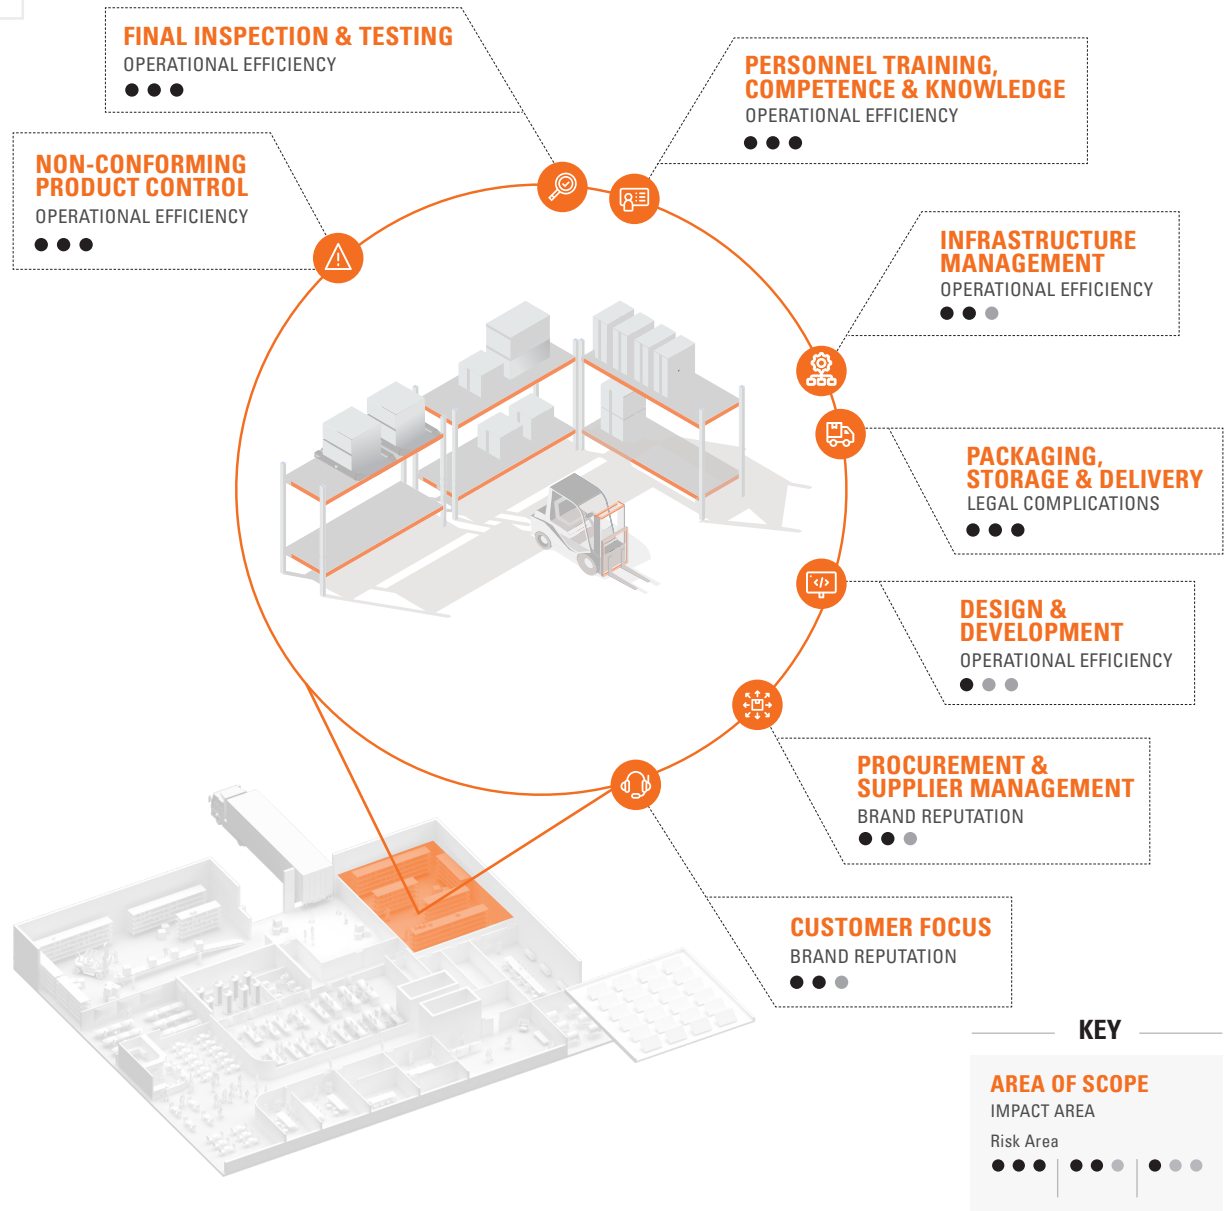

As a global leader in quality standards and assessments, SGS has the data analytics, personnel and industry knowledge to ensure customer compliance.

Benefits

- Consistent KPIs to assess all suppliers
- Assess against industry requirements and customer needs
- Efficient and experienced auditors to streamline and simplify the assessment process
- Auditors strategically located in key sourcing countries providing cost efficiencies & faster execution time

Types of Assessments

- Factory Quality Assessment (FQA)
- Factory Capacity and Capability Assessment (FCCA)
- Remote Factory Quality Assessment
