ASTM E84 PLASTICS/POLYMERS POLICY

Please note that all plastics and/or polymeric materials are charged at a higher test fee because of the required cleanup of the tunnel after testing.

SGS Govmark limits flame spread and smoke developed evaluation of plastics and other polymer based compounds of unknown combustibility and smoke generating characteristics to a maximum thickness of 0.125" and submitted in flat sections only sufficient to achieve the required specimen length.

Specimens of greater thickness may be conducted if, after screening by lab personnel, a judgment is rendered to proceed to test. The test will be terminated at any time when:

1. The smoke developed exceeds 500 rendering the material unclassifiable,
2. The temperature at the 24-ft. end of the tunnel exceeds 1,250°F, OR
3. When, in the judgment of the test operator, the safety of personnel or the threat of the equipment and/or environment is deemed to be probable.

SPECIAL INSTRUCTIONS: All special instructions contained in your purchase order, such as testing modifications, extra report copies, invoice distribution, etc., must be repeated on this test order form.

Testing will be conducted as directed by this test order form which supersedes the purchase order.
